

I am entering "seminar season" again!

Hoping to generate interest in another *Monster Maps and More* meeting. *Monster Maps and More* is a book I created using Google Earth images, GPS data, text and pictures to document the exact locations where I've caught trout over 27 inches throughout the Upper Laguna Madre/Baffin Bay system. The book includes a spreadsheet with GPS data, stories of big fish caught, discussion of the conditions conducive to catching in the areas documented and much more.

I will be adding a couple of new pages to the book, based on the big fish we've caught this year, including a couple of 10 pounders. In the seminar related to this book, I spend four hours (8 am to noon) making sure all involved know how to best use the book, and summarizing its contents.

I need four participants to commit in order to do an out of town meeting (most likely either in Houston or San Antonio), and at least three to do a meeting here on North Padre, where I live. Tentatively, I'm throwing out two dates as possible for a *Monster Maps and More* seminar.....June 21 and 28. If you are interested in attending a seminar of this type, please let me know by emailing me at [kevxl8@mygrande.net](mailto:kevxl8@mygrande.net) or calling me at 361 688 3714. Make sure to indicate which date works better for you, and also where you live.....I will begin trying to put a meeting together, either at FTU in Houston, a hotel in San Antonio or at the Ashton Inn on N Padre.....

Also, if you have an idea for a different type of seminar you'd be interested in (I normally charge between \$150 and \$200 per person, depending on the concepts and length of the meetings) please let me know what concept or concepts interest you.
