

I wanted to pass along this testimonial I received from someone who recently purchased my new book. Sounds like it is helping him formulate better plans for his fishing trips. I always appreciate feedback, especially this kind!

Kev

Got the book [*Productive Places and Patterns*] and wanted you to know, I haven't been disappointed. It's very informative and useful...I appreciate you sharing your information, as it's helped me to better plan my fishing excursions and think about patterns and places, taking into consideration whatever variables are at play. Your book has revitalized my fishing, and I am eternally grateful.
