

I recently finished creating a new DVD called *Primetime Trout Tactics*, using footage I shot this past winter and spring, while I and my customers were catching a bunch of big trout. The purpose of the 39-minute product is to generate a list of strategies one can use to enhance productivity when prime opportunities for catching monster specks arise. I mostly used on-site audio captured while I was shooting the clips, and have added in some graphics related to lure choice, presentation, conditional variables and other aspects of angling for trophy trout with artificial lures. These graphics closely resemble those from my first DVD, *Advanced Trophy Trout Tactics*.

In the future, this new product will replace *Advanced Trophy Trout Tactics* in my Complete Works Set. Once I finish the cover graphics and have copies replicated, I will offer *Primetime Trout Tactics* for a price of \$18.99, which will cover cost+tax+shipping. Until I create the buttons on this site and on FishBaffinBay.com, readers of this blog can purchase the new DVD for \$15, by submitting a payment through the Donations button on this site. A promotional trailer for the DVD can be viewed on the Pics and Vids page.
