

Soft Science shoes are way cool. They are durable, comfortable, stylish, easy to clean and won't leave marks on the deck of a boat. With soft, tacky soles, they don't slip on and around boats either. I recently made several tough walks through flood waters during Hurricane Harvey while wearing my pair of Soft Science shoes (The Fin model), and they performed magnificently. Lovin' the look of the new Durango model! Check out SoftScience.com to see all they offer.
